

Organised by

7TH INTERNATIONAL ECOSUMMIT ECO-CIVILIZATION FOR A SUSTAINABLE AND DESIRABLE FUTURE

JOIN US AT
ecoSummit 2024
14 – 19 December, 2024
Zhengzhou, China

Join us for an exciting and comprehensive program highlighting terrestrial ecosystems, including mountain, water, forest, farm, lake, and grassland ecosystems crucial for various habitats in watersheds.

TOPICS INCLUDE

Terrestrial Ecological System

- Mountain ecosystem
- Watershed ecology and society
- Forest ecosystem, conservation, and sustainable use
- Sustainable agriculture and farming
- Lake restoration and rehabilitation
- Grassland conservation and sustainable use

Ecology and Biodiversity

- Biodiversity and biological conservation
- Biological invasions
- Disturbance ecology
- Ecological complexity
- Ecological indicators
- Ecological modeling
- Ecosystem creation and restoration
- Ecosystem health
- Ecotoxicology
- Coastal and marine ecology
- Scaling from genomes to ecosystems

Policy and Governance

- Climate adaptation and mitigation
- Climate change and carbon neutrality
- Eco-health and public health (diseases)
- Environmental policies and frameworks
- Fragile ecosystems and hotspot management
- Eco-civilization and sustainable development
- Biophysical planetary boundaries and health
- Anthropogenic pressure and ecological resilience
- Citizen Science and local actors (NGOs)
- Ecological economics
- Ecosystem services
- Ecotourism
- Industrial ecology
- Innovative technology for ecological sustainability

Chairs

Junguo Liu,
North China University of Water
Resources and Electric Power, China

Ida Kubiszewski,
University College London, UK

Robert Costanza,
University College London, UK

B. Larry Li,
University of California, Riverside, USA

Deadlines

Symposia proposal deadline:
10 May 2024

Abstract submission opens:
27 May 2024

Abstract submission deadline:
19 July 2024

Early registration deadline:
20 September 2024
